

ABSTRACT OF THE DISCLOSURE

A method for giving notice of incoming call through vibration of a mobile communication terminal, and more particularly a method for giving notice of an incoming call through various vibration patterns. The method configures various vibration patterns according to a user's selection, sets the vibration patterns in a basic or particular incoming call notification mode of the mobile communication terminal, and generates vibration based on a set vibration pattern in the basic incoming call notification mode or generates vibration based on a particular vibration pattern mapped to a particular caller telephone number set in the particular incoming call notification mode when the incoming call is received.
